Section 8: How It Works

HOW IT WORKS

Step 1: We Find Your Revenue Leak

For 7 days, we observe your WhatsApp traffic silently. No disruption to your team. At the end, you see the exact RM amount leaving your hotel every night — unanswered, unrecovered, gone to Agoda.

Step 2: We Go Live in 48 Hours

We configure everything. Your WhatsApp, your room types, your rates, your tone. Your team spends 30 minutes total. Then Nocturn AI is live — responding to guests in BM and English, around the clock.

Step 3: Your Staff Stays in Full Control

When a guest inquiry comes in after 6 PM, Nocturn AI drafts the reply — with accurate rates and availability. Your staff reviews it in the morning and clicks Send. No new system to learn. No robotic auto-replies going out unsupervised.

Step 4: You Get a Report at 9 AM Every Morning

Every morning, your GM gets one clear email. It shows: how many inquiries came in overnight, how many were handled, how many became direct bookings, and the exact RM recovered. No guesswork. Just numbers.

Step 5: You Keep the Revenue. We Take 3%.

We only earn when you earn. Every confirmed booking we help close, we take 3%. The other 97% — plus the 15% you used to pay Agoda — stays with you.

Suggestions

- **Icons per step:** Use a simple, clean icon for each of the 5 steps. Suggested icons: a magnifying glass (Step 1), a lightning bolt or clock (Step 2), a human + checkmark (Step 3), an envelope or chart (Step 4), and a coin or handshake (Step 5). Keep them monochrome and professional — nothing cartoonish.
- **Demonstrative video:** This section is the ideal place to embed a short screen-recording walkthrough (2–3 minutes) showing the GM Report in action and how a staff member reviews and sends a drafted reply. This directly addresses the "will it sound robotic?" and "is it complicated?" objections without a single word of copy.
- **Real GM Report screenshot:** Consider placing the actual GM Report email screenshot (as shown on your site) directly below Step 4. Seeing the real output — with real numbers like "RM 4,280 recovered" — does more persuasion work than any headline.
- **Mobile-first layout:** Your audience checks their phones first thing in the morning. Make sure this section renders cleanly on mobile, with each step stacked vertically and easy to scan.

Section 9: The Investment

THE INVESTMENT

> **Only 10 founding properties accepted. VMY2026 peak season is coming. Once these spots are filled, this pricing closes.**

One Plan. No Tiers. No Confusion.

Most software companies give you three packages designed to push you toward the expensive one. We don't do that. There is one plan. It covers everything. And it's built so that we only win when you win.

Nocturn AI — Revenue Partner Plan

- **Full setup in 48 hours** — we handle everything, your team spends 30 minutes total
- **WhatsApp + Email + Website Chat** — every inquiry channel, one unified dashboard
- **AI trained on your property** — your rates, your rooms, your tone, your FAQs
- **Automated follow-up engine** — 24hr, 72hr, and 7-day follow-ups configured for your guest segments
- **Daily GM Morning Report** — exact RM recovered, OTA fees saved, inquiries handled, guest sentiment
- **Human-in-the-loop escalation** — VIP guests and complex requests handed to your staff with full conversation history
- **PDPA 2024/2025 compliant** — your guest data stays yours, always
- **Direct WhatsApp line to the founder** — report issues, request features, get answers in hours (founding cohort only)
- **30-Day Revenue Recovery Guarantee** — if we don't recover more than our fee, next month is free

Setup Fee: RM 999 (one-time)

Platform Fee: RM 199 / month

Performance Fee: 3% only on confirmed bookings we help close

Your net gain per recovered booking vs. OTA route: ~12%–15%

Button: I Want to Stop Losing Revenue to OTAs — Apply Now

Suggestions

- **Single-plan layout works in your favor here.** It removes decision fatigue entirely. Fahmi does not want to compare packages — he wants to know if this works and what it costs. Lead with the guarantee and the performance-based fee structure prominently.

- **Add a simple cost comparison visual** directly below the plan — two columns: "Current OTA Model" vs. "With Nocturn AI." Use the revenue calculator data from your site (e.g., RM 50,000/month in bookings = RM 9,000 to OTAs vs. RM 1,699 total with Nocturn). This anchors the RM 999 setup fee against a RM 9,000/month bleed. The math does the selling.

- **Urgency note placement:** Put the "Only 10 founding properties" note at the very top of this section, before the plan details. It frames everything that follows as scarce and time-sensitive — not as pressure, but as honest context.

- **Consider adding a one-line reassurance** just above the CTA button: "No lock-in contracts. Cancel anytime." This removes the last friction point before the click.

Section 10: Our Guarantee

OUR GUARANTEE

The "Pays-For-Itself" Guarantee: Measurable Results in 30 Days, or You Don't Pay

Run Nocturn AI for 30 days. At the end of that month, we sit down with the numbers — inquiries captured, direct bookings closed, OTA commissions saved.

If the direct revenue we recovered for you does not clearly exceed the cost of our service for that month, we waive the following month entirely and refund you the difference.

No vague promises. No "usage reports" that don't connect to your bank account. Just a hard number, in Ringgit, that proves whether we earned our place in your operation.

This is not a standard software guarantee. Most software companies offer a refund window because they know you won't bother. We offer this because our performance fee means we only make real money when you do. Your success is not a marketing line for us — it is the only way our model works.

Suggestions

- **Guarantee seal:** Place a strong visual seal directly beside or above this text — a circular badge that reads "30-Day Revenue Recovery Guarantee" with "Measurable Results or Next Month Free" underneath. A shield icon works well here. Keep it clean and professional, not flashy.
- **Founder's signature:** Consider adding Ahmad Basyir's name and signature image below the guarantee text. A personal guarantee signed by the founder carries significantly more weight than a corporate policy statement — especially for an audience that has been burned by faceless tech vendors before.
- **Reinforce the risk reversal in plain language:** One short line just below the seal, in a slightly smaller font: "You carry zero risk for the first 30 days. We carry it for you." Simple. Direct. Effective.
